

345 Microseconds Average Round Trip Latency to the BATS Europe Matching Engine

In today's latency-driven marketplace, trading firms look for the fastest possible routes to access European liquidity and ways to improve order management and trading lifecycle processes. To achieve this, firms consider where best to collocate for connectivity to liquidity venues, clearing counterparties and service providers via cross-connects or direct fibre connections and without compromising security, risk and cost.

Interxion now offers a cost-efficient, low-latency proximity solution to access BATS Europe. The solution allows market participants to achieve an average round-trip latency to BATS Europe of less than 345 microseconds over dedicated fibre connections (based on 245 microseconds latency in the BATS Europe matching engine and below 100 microseconds round-trip propagation latency).

Market participants located at Interxion's City of London Financial Hub benefit from connecting to the extensive finance community available from Interxion, including exchanges and MTFs – such as BATS Europe, investment banks, clearers, and market data technology and connectivity providers.

BATS Europe - an introduction

- BATS Europe is known for its cutting-edge technology, aggressive pricing and outstanding customer service
- BATS Europe offers trading in more than 1,000 securities from 15 European markets and includes ETFs
- BATS Europe is a fast-growing MTF, executing 8-10% of FTSE 100 and 5-6% of overall European market share by average daily value of shares traded

Interxion - an introduction

- Largest carrier-neutral data centre provider in Europe
- Specialist provider of colocation and proximity hosting service to the Financial Services industry
- 55,800m² equipped space
- 28 data centres in 11 countries
- Unrivalled choice of network service providers
- 200+ financial sector clients
- 94% customer satisfaction

Key benefits

- One connection for pan-European trading
- Order routing to primary exchanges, MTFs and dark pools
- Ultra-low latency with an average round-trip time of 245 microseconds and 99% of all orders within 345 microseconds
- Simple connectivity model – VPN access to test environment
- Free membership, market data, FIX ports and testing
- Simple, flat, maker-taker pricing model
- Broad suite of free, value-added participant tools and analytics

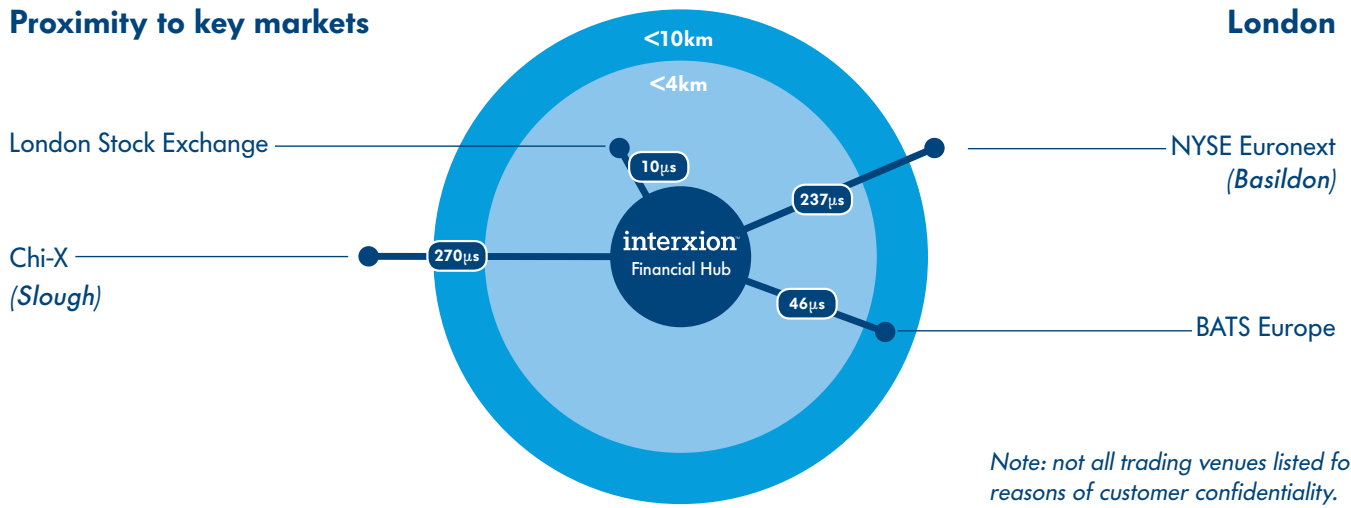

Key benefits

- City of London location – equidistant to the key markets
- Sub-millisecond connectivity to all London-based liquidity venues
- Access to a large and growing community of industry leading service providers
- Wide choice of network service providers
- Industry-leading security and redundancy levels
- Seamless scalability of space & high-density power (up to 5KVA per rack as standard)
- Test Lab for latency assessment, optimisation and innovation
