

An abstract digital background with a blue and green color palette. It features glowing, swirling lines and patterns that resemble data connections or network paths, set against a dark, textured background.

MAKE THE RIGHT CONNECTIONS FOR YOUR BUSINESS

The global, national and local connectivity you need

THE INTERCONNECTION HUB

Interxion is the interconnection hub for the world's digital businesses. Wherever you invest with us, you'll have the right connectivity for your business. Our data centres have become gateways to emerging markets and landing stations for major continental subsea cables. Interxion is the platform for extending your reach into new domestic, regional and international markets.

Our data centres are situated on the major highways of the Internet, in the metropolitan areas of 13 European cities. They attract a rich diversity of over 700 global and national connectivity providers, including fixed and mobile network operators, Internet exchanges and content distribution networks.

In fact, we offer the highest density of carriers in Europe. Between them, they give you access to 100m broadband subscribers and 160m mobile users in Europe, and put you within 100ms of 77%* of Europe's GDP.

We also provide cost-effective, low-latency interconnections to your business community within our data centres.

What does all this reach and choice mean for you? You can select exactly the networks that will best meet your needs and deliver the optimum performance for your business.

Business benefits

- **Enable your workforce** – use the latest technology and newest services that network providers bring to our data centres first.
- **Improve flexibility** – plan for an unpredictable future by increasing capacity or switching suppliers easily as your requirements change.
- **Mitigate risk** – use multiple providers to ensure redundancy and resilience in your corporate network.
- **Cost savings** – exploit the competitive market within our data centres.
- **Enhance operational performance** – from low latency connections within our data centres and by using the fastest networks for national and international connectivity.

About Interxion

Interxion (NYSE: INXN) is a leading provider of carrier and cloud-neutral colocation data centre services in Europe, serving a wide range of customers through over 45 data centres in 11 European countries. Interxion's uniformly designed, energy efficient data centres offer customers extensive security and uptime for their mission-critical applications. With over 700 connectivity providers, 21 European Internet exchanges, and most leading cloud and digital media platforms across its footprint, Interxion has created connectivity, cloud, content and finance hubs that foster growing customer communities of interest.

Connect nationally and internationally

At Interxion you get the choice and flexibility you need to build secure, reliable networks with the right performance at the right price. We're on hand to guide you and help you select the best match for your needs. You can use multiple carriers to ensure redundancy and resilience; or move easily from one provider to another as your requirements change, with minimal disruption to your business.

International network providers

You'll find all the leading international network providers in our data centres who deliver predictable, low-latency performance for global networks.

National and metro networks

National incumbent operators and many other national providers are present in all our data centres. Together they offer extensive national coverage and the widest access to business and residential markets.

Local loop providers

Local loop providers offer large-capacity fibre connections from our facilities to others in the same country, enabling efficient backups, data replication and other large-scale data transfers between data centres.

Mobile network operators

Over 30 MNOs are present in our data centres, simplifying your access to mobile platforms and mobile users. Our mobile ecosystem also includes leading roaming, clearing and settlement service providers.

Content distribution networks

Our data centres give you access to many of the top CDNs, helping you enhance end users' experience of websites and other online content.

Internet exchanges

Our facilities are home to 21 leading European Internet exchanges – more than any of our competitors. Joining an Internet exchange gives you access to hundreds of members and enables you to reduce the cost of handling Internet traffic.

11 Countries, 13 cities

Austria: Vienna

Belgium: Brussels

Denmark: Copenhagen

France: Paris, Marseille

Germany: Frankfurt, Düsseldorf

Ireland: Dublin

Netherlands: Amsterdam

Spain: Madrid

Sweden: Stockholm
