

PRIVATE ROOM

Customised, Optimised, Secure

Your fully customised mission critical facility

When you choose an Interxion data centre to house your equipment, you can rely on our highly secure facilities with exceptional levels of power availability, redundancy and connectivity.

Power resilience, exceptional connectivity, and security underpin all of our colocation products for the benefit of enterprises, cloud and service providers of all sizes. We offer a range of equipment housing options from individual Cabinets, to Cages and Private Rooms which provide extra layers of security.

Our products are standardised across all of our data centre campuses, so whether you locate in one facility or have an international deployment you can rely on the same functions, security and service levels across our European footprint.

Our Private Rooms offer a fully bespoke solution, with dedicated power distribution, mechanical cooling, fire detection/suppression, and security. As a data centre within a data centre, a Private Room is a mission critical facility with infrastructure capacity and space segregated and dedicated to meet the most exclusive business requirements, which also benefits from Interxion's superior facility operations, services and connectivity.

Interxion Private Room

- **Optimised solution.** Bespoke configuration of infrastructure in a Private Room dedicated to your business.
- **High availability.** N+1 and 2N configurations available.
- **Ample power.** Single and three phase AC power as well as DC. Power is available as a capacity allocation or by quantity of plug sets.
- **Flexibility.** Pan-European availability, broad selection of product configurations and power allocation options, supported by robust service levels

We're there when you need us

Whether you need assistance with power or racking configurations or support for your kit in operation, we're there. Our services include strong SLAs, 24x7 support through our European Customer Service Centre (ECSC), on-site Hands & Eyes services, and self-service support and administration through our Customer Portal.

About Interxion

Interxion (NYSE: INXN) is a leading provider of carrier and cloud-neutral colocation data centre services in Europe, serving a wide range of customers through over 45 data centres in 11 European countries. Interxion's uniformly designed, energy efficient data centres offer customers extensive security and uptime for their mission-critical applications. With over 700 connectivity providers, 21 European Internet exchanges, and most leading cloud and digital media platforms across its footprint, Interxion has created connectivity, cloud, content and finance hubs that foster growing customer communities of interest.

The Interxion Private Room

Interxion's colocation infrastructure provides a secure mission critical foundation for enterprise companies and service providers. Our data centres have attracted a diverse customer base, creating dynamic communities of interest. These bring together companies operating in the same sector so that they can benefit from fast and low-cost interconnectivity and establish valuable business relationships.

A Private Room offers a unique opportunity to fully customise your colocation solution.

- **Power options.** Single and three-phase power, as well as DC, by plug set or bulk allocation.
- **Metering.** Both circuit-based and usage-based choices for all AC power options.
- **High availability.** N+1 and 2N configurations, with high availability SLA's.
- **Business optimisation.** Configurations, capacity, and on-site support options for customised solutions.
- **Improved customer experience.** Standardised Products across all Interxion data centres, saves time and increases efficiency.

Cross Connects

When you colocate in an Interxion carrier and cloud-neutral data centre you can minimise networking costs, significantly reduce latency and improve application performance by using Interxion's portfolio of Cross Connects.

These directly connect you to Europe's widest choice of national and international connectivity providers and to any other Interxion customer collocated in the same data centre, campus or city.

All our interconnectivity runs through a centralised Meet-Me Room in each data centre, enabling our customer communities to do business with minimal latency. The Meet-Me Rooms are secure and private, with rigorously ordered cable management and supported by attentive maintenance.
