

STOCKHOLM 6

The Interconnected Hub for your Digital Business

Colocate with Interxion: A Digital Realty Company

STO6 is the latest and biggest addition to Interxion's Stockholm campus. It introduces 3,300sqm of data centre space to help even more businesses benefit on the capital and innovation in the North. Interxion's STO6 carrier and cloud-neutral data centre provides secure, scalable infrastructure for mission-critical IT systems, with a wide range of connectivity solutions.

At a glance

- 3,300 m² of newly built equipped space
- Located 15km from the city centre of Stockholm
- Local gateway to Internet users in the Baltics and Russia
- Reach more than 30 million Internet users in Nordics and Baltics
- Fully interconnected with STO 1-5
- Direct access to Amazon Web Services, Microsoft Azure, IBM Cloud, Google Cloud and Oracle Cloud Infrastructure
- Connection to local private clouds
- Access to over 80+ carriers/ISPs and CDNs
- Multiple leading Internet Exchanges such as Netnod and STHIX

Interconnect directly with your partners, suppliers and cloud platforms within our data centre.

- Interconnect to over thousand businesses collocated within Interxion
- Interconnect to minimise networking costs
- Interconnect to improve performance

The ideal environment for your business, today and tomorrow

- Flexibility to scale up and down depending on your demands
- Reach the entire Nordic market with over 25+ million users quickly in our network-neutral data centre
- Build the ideal hybrid cloud environment for your business

About Interxion: A Digital Realty Company

Interxion (NYSE: INXN) is a leading provider of carrier and cloud-neutral colocation data centre services in Europe, serving a wide range of customers through over 90 data centres in 15 European countries. Interxion's uniformly designed, energy efficient data centres offer customers extensive security and uptime for their mission-critical applications. With over 800 connectivity providers, 24 European Internet exchanges, and most leading cloud and digital media platforms across its footprint, Interxion has created connectivity, cloud, content and finance hubs that foster growing customer communities of interest.

Energy efficiency and sustainability

- 100% renewable energy
- Award-winning district cooling solution
- Phased modular architecture optimises Power Usage Effectiveness (PUE)
- Data centres operated to the highest energy efficiency standards
- Free cooling system - Adiabatic cooling and Cold Aisle Containment design

Open district heating

The new data center will already from the start be connected to the cooperation that Interxion and Stockholm Exergi have regarding heat recovery. Interxion have been cooperating with Stockholm Exergi since 2015 by returning waste heat to the district heating network. A collaboration Interxion now strengthens through a large proprietary investment in heat pumps. This means that Interxion from STO6 will supply hot water directly into the district heating network and thus contribute to heating even more apartments with excess heat from the data centre.

In total, this means that excess heat from Interxion's data centres will heat 10 000 modern households in Stockholm.
