

## Unmetered customers – changes to invoicing

The below extract represents a typical invoice for a customer with an unmetered 50 kW cage in LHR20 that was received in respect of services provided in **September 2022**, prior to changes in the invoiced products and power prices.

In this example this is configured as 'kW Adv' and 'Private Cage'. The product configuration for space and power components will vary, but the important data points are the total monthly amount for space and power and the number of kW contracts.

In this example the total unmetered price for space and power is £425/kW on 50 kW.

In order to separate the power usage element of the contracts and ensure transparency on any price changes, we have created the product 'Pre-paid power monthly' which will appear on invoices for unmetered power contracts going forward.

The below invoice demonstrates how the above product configuration would appear with the inclusion of the new product pre-paid power at a current price of £200/kW.

Note the prices of the 'kW Adv' and 'Private Cage' are reduced to only represent the capacity element and not usage. The invoice total has not changed.

<b>To be paid</b>							GBP 24,000.00

Below is an example of the invoice that will be received for **October 22**. We have applied an increase the power usage element through the 'Pre-paid power monthly' product. As an example, the below increase has been from £200/kW to £400/kW.

The prices of the kW Adv and Private Cage have not increased from the previous invoice. If your agreement is subject to indexation, then this will apply as normal to these products and not the Pre-paid Power Monthly.
